GREETINGS FOR 1925

Dear Friend and Customer:—It is a privilege and a pleasure to greet you again this New Year, January 1925. Right here on this page, please permit me to present to you a few others of my Friends who are scattered over this good old United States. Each of these friends will make a little speech as they are presented.

Mr. G. W. Wertz, Montgomery Co., N. C.

The 10,000 Dewberry plants sent me in Prime of condition and I want to congratulate you on the way they were packed. Ideal I call it.

Mrs. W. L. Holden, Rutland Co., Vt.

Ever one of the Strawberry plants you sent me this Spring are alive. Many thanks for such fine plants. They are the Premier.

Mr. J. W. Gulick, Dorchester Co., Md.

The Strawberry plants sent me are fine. Please find enclosed order for 1000 Dewberry plants, check inclosed to cover.

Mr. George Larot, Susquehanna Co., Pa.

I received my order of Strawberry plants and they were best plants we ever had..

Mr. J. P. Cox, Cabarrus Co., N. C.

The Dewberry plants I ordered from you arrived in good condition, they are nice well rooted plants.

Mrs. Elizabeth Page, Dorchester Co., Md.

My plants arrived April 28th, I am pleased to state that the plants looked very nice, much better than the plants I got from——Nurseries. Thanking you for your promptness.

Mr. Claud B. Worden, Benzie Co., Mich.

I wish to thank you most kindly for the nice Strawberry plants you filled my order with.

Mr. Albert M. Tarr, Sussex Co., Del.

The Asparagus seed we got of you came up fine.

Mr. G. J. Streicher, Napa Co., Cal.

I received the Strawberry plants to day in fine shape. They are nice, well rooted stock. The inspector said they were the best rooted plants he had ever seen.

Mr. Mahlon E. Wilcox, LeComming, Co., Pa.

I beg to acknowledge the 5000 Strawberry plants ordered from you I received them Four Days after ordering them in the finest kind of condition. Thanking you for your promptness and assuring you of a large order next Spring.

Mr. William H. Parsil, Middlesex Co., N. J.

Plants arrived in good condition.

Mrs. A. Botka, Chautaugua Co., N. Y.

We received the plants O. K. and they were rooted nicely. Will tell my neighbors about your nice plants and good service.

Mr. W. J. McNitt, Mifflin Co., Pa.

Received the Asparagus plants and they are fine. I wish to thank you. for you have certainly treated me fair and honorable and when I am in need of any more I will send you the order.

Mr. T. S. Hampton, Cape May, Co., N. J.

I am about ready to order some small fruit and Asparagus plants and would like a copy of your latest catalogue. The plants I got from you last year were O. K. Some of my neighbors wants to order plants from you this year.

Mr. Geo. Carr, Kent Co., Del.

Pleased to report Strawberry plants arrived today and are fine. Thank you for prompt attention.

Mr. J. H. French, Mifflin Co., Pa.

Pardon my delay in not acknowledging receipt of the fine Raspberry plants which I received ten days ago. These were as fine a bunch of plants as I ever seen.

Mr. Earl R. Koskinson, Perry Co., Ohio.

Strawberry plants arrived in first class condition. They were very nice plants also the Grape vines were nice.

Mr. Walter C. Robinson, Palm Beach Co., Florida.

I received the Strawberry plants in good condition. Altho they lay in the office here two days, they are coming along fine.

Mr. Donald F. Fenn, Elizabeth City Co., Va.

The plants reached us in excellent condition and we thank you for prompt shipment.

Mr. R. L. Talbot, Macon Co., Mo.

The plants arrived in good shape and are doing fine.

Mr. J. G. Butler, Sampson Co., N. C.

Received the Strawberry plants the 5th. Like them fine. They are set and they did not stop growing. I did not have any plants left over, but had a plenty so you know I am pleased. Thanking you for your promptness.

Mrs. Albert Heine, Randolph Co., Ill.

Received my order of Strawberry plants and am well pleased.

This social hour is very pleasant and it would be a pleasure to prolong same, yet we have only time and space here to hear from a very few of the many satisfied customers who encourage and inspire us every year with their pleasant remarks.

Truly Yours for good service, good plants and seeds.

I thank you,

V. R. Allen.

NEW MARKETS

The demand for good quality of strawberries continue to grow and each year new markets. Only a few years ago the entire crop of strawberries was placed on the market by the commission merchants in our cities, regardless of quality or condition of the fruit. Now all the surplus, small or over ripe fruit is largely used by the packers of preserves and juices and these packers are finding a great market for their produce. Last year (1924) the packers of the state of Delaware used more than 1,500,000 quarts of this grade of strawberries, keeping it out of the retail market. By so doing stimulating better prices for good table berries.

The strawberry crop last year (1924) was worth to the growers of the United States around \$35,292,000. Did you get your share of this amount? If not plan Right Now to Plant your Patch of Money Making Strawberry Plants.

Yes we agree with the other Nurserymen and Plant Growers of this Peninsula that the crop of strawberry plants for the Spring of 1925 is short. Weather conditions during 1924 were not friendly to growing the usual crop of plants. Labor conditions were bad—and cost of production was high. Yet order Early, Right Now and have your plants reserved and we will make shipment at the time you want to plant out. Please permit me to insist **ORDER EARLY.**

READ BEFORE ORDERING

TIME TO ORDER. Just as soon as you receive this Price-list, as that will insure you of getting just what you want. Plants will be reserved and shipped when you are ready for them.—Order early and be sure of your supply.

TIME OF SHIPMENT. From October 20th to May 1st, after this date plants are shipped at customer's risk. Our Northern customers usually order throughout the month of May and with a late season the plants will go through in good condition. Yet we do not advise shipping at this late date. We will only fill orders after May 1st, at customer's risk. We will use every precaution in crating and packing and do everything in our power to put plants through in good condition.

BIG LATE

PAYMENT. Invariably cash before shipping. To reserve orders for future shipment, one-fourth, cash must accompany order and balance before plants are shipped.

PACKING. No charge for boxing and packing. Everything is delivered F. O. B. trains at rates given in this Price-list, yet we use every precaution to see that your order is well packed and properly boxed.

NO ORDER TOO SMALL. Your order for twenty-five plants will receive the same care and attention as will an order for twenty-five thousand.

When you receive more than one catalogue please hand to your neighbor.

TRUE TO NAME. We use every precaution to have our plants and seeds true to name and believe we make few mistakes, yet we will not be responsible for any sum greater than cost of stock proving untrue to name and in no way will we be responsible for the crop grown.

GENERAL INFORMATION. We cannot waste space to go into detailed information as to type of soil best adapted for strawberry cultivation neither shall we take up the matter of how the roots should be trimmed and blossoms clipped, ways for best setting and cultivation, or as to the proper mating of the pistillate variety (female generally referred to as imperfect blooms and are marked in the Price-list Imp.) with the bi-sexual variety (male variety generally referred to as perfect blooms and are marked in the

"BE SURE TO ORDER EARLY"

Price-list as Per.) yet all these points are worthy of careful consideration. We will be glad to give you full information on these points providing you need this information. We do not claim to possess the wisdom of Solomon, but have practically grown up in the strawberry patch and having been in the business nineteen years for ourselves, there may be just a few things we know which would be of interest to the beginner, and for the asking, our information is yours. However, there is one word we wish to say, Set Your Plants Early; ninety per cent of failure come from late planting.

ORDER EARLY

TO CUSTOMERS NORTH OF US. It is a fact that your seasons are later than ours, yet it will be of mutual interest for us to do business together. We would suggest that you order your plants during March and April, before they are too far advanced, and on receipt of the plants open the bunches and place them in thin layers in trenches dug just deep enough to receive plants, heel them in, then cover lightly with straw for protection; you will have the plants in the very best condition when your conditions are right for planting.

ALL ORDERS ENTRUSTED TO OUR CARE, are delivered to Transportation Co., well packed, and in good order, and we get receipt to this effect. As we have no further control over shipment after it leaves our hands, our responsibility ceases on delivery in good order to the Carriers. Any claims for damage in transit or delays, should be made at point of delivery. If shipment is delayed in transit, be sure to examine at office, and if found damaged by delay or in transit, refuse same and notify us at once. Or accept same and have the agent to make notations on your express bill of the conditions. Unless you do this, you will find it hard to make collections on claims.

VARIETIES. We have carefully selected the Varieties that are making Money for the Growers of Strawberries all over the United States, varieties that are well adapted to almost every type and condition of soil. The Varieties that are Money Makers to the Man who Plants them.

We have the Postal and Western Union Telegraph with telephone connections. Tell your neighbors about us. If he will send his name and address on a postal card, we will be glad to mail him a Price-list, we have one for him.

SPECIAL NOTICE. Always write name and address very plainly. Do not leave us to guess at letters A. O. E. I. N. U. W. M.

This year plant **ALLEN NURSERIES Money Making Varieties** of Strawberry plants and have the satisfaction of knowing that you have the best, both as to variety and quality of plants.

Sussex County, Delaware, produce more strawberries than any other one county in the United States. We are located in the center of the strawberry belt, which enables us to select with care the best Money Making and Garden Varieties. May we have your order. Delaware paid to labor for picking the strawberry crop of 1924 around \$430,000.00.

Pollenizing:—Plants marked (per) are staminate or bi-sexual and will produce fruit without another variety being planted with them; those marked (imp) are a pistillate sort and will not produce fruit successfully unless some staminate or bi-sexual sort is planted with them. The rule is three rows pistillate sort and one row of the staminate or bi-sexual sort. Some growers plant the bi-sexual sorts in the rows with the pistillates, using one-fourth bi-sexual, which is better.

BIG JOE

VARIETIES AND DESCRIPTIONS

AROMA. (Per) Medium late. Valued because of its uniformity and productiveness.

BRANDYWINE. (Per) Originated at West Chester, Pa., in 1895. Medium late. Valued in many berry districts, especially Florida and southern California. It is a heavy cropper of fine quality fruit anywhere.

BIG JOE. (Per) Originated by J. H. Black & Son. One of the big money makers. Berry always attracts buyers attention and commands the highest price of the market. Cap large, light green; berry large, round-conic, dark crimson, flesh medium red, firm sub-acid. One of the best late varieties.

BIG WONDER. We are fruiting this variety for our first time, have a fine lot of plants, will use the originators description, as we have never seen Big Wonder fruiting.. Rare indeed are varieties which possess the winning qualities embodied in Kellogg's Big Wonder. Here is a strong, medium-late bisexual which, in foliage and plant growth, simply "can't be beat."

The plants grow very tall and vigorous and the leaves which are borne in strong, heavy, are large, dark green, of exceptionally tough texture and practically immune to disease. A long, heavy root system enables this variety to withstand weather extremes to a remarkable degree. Its berries are large, glossy dark-red and highly flavored. It produces abundantly and the berries are well protected by the foliage indeed "A Wonderful Strawberry."

BEDARENA. We have never fruited this variety; Introduced in 1919 by R. M. Kellogg, apparently the same as "Beaderarena" which was originated by A. F. Etter of California.

BIG LATE. (Imp.) Stands at the top in productiveness, a wonderful producer average large in size. The berries are produced in great clusters on strong stems with wonderful shipping qualities. You should plant BIG LATE with MASCOT. It also mates well with BIG JOE. For Big Results plant these BIG BERRIES.

PREMIER

CHESAPEAKE. (Per.) Very late. Considered by many to be the best late berry. The fruit is very much in demand, for the fancy trade and is a fine berry for the home table. If you want Chesapeake be sure to order early, as it is a shy plant maker and the demand is always greater than the supply.

COOPER. We have not as yet fruited this variety, but it has made a splendid plant growth and a very favorable impression with us.

We use the originators description. "Never a berry with sign of a core, never a berry that is hollow, never a green tip, very bright red, a flavor as good as the best, size unequalled, 18 to 25 berries fill a quart basket."

DR. BURRELL. (Per.) It bears well, a good shipper, excellent for canning and very delicious to eat on the table. Berry not big, a good one to plant with imperfect flowering sorts.

Elliott, Md. April 4, 1923.

I received the dewberry plants all O. K., and have them all set out and will always be glad to recommend you to anyone who I know wishes to purchase any of the different nursery stock you offer for sale

R. J. G.

GLEN MARY. (Per.) Plants spreading, leaflets dark green, fruit stalks of medium length fairly erect, berry large irregular, round conic Calyx large, flesh medium red, firm juicy, core solid, flavor mild sub-acid to sweet, quality good. Popular for market and home use because of its productiveness and large handsome berries of good quality. Many of its early blossoms do not produce enough pollen to fertilize themselves and better results are obtained if planted with such varieties as Premier, Dunlap and Wolverton.

HORSEY

GANDY. (Per.) Very late. The berry that paid more mortgages in Sussex Co., Delaware, than any other variety. This berry stands as the champion late berry, and holds the place among late varieties that the Premier holds among the early varieties. If you have Gandy-land (low springy or black loam) be sure to plant heavy with Gandy. Never under any circumstances plant on light sandy soil.

GIBSON. (Per) Mid-season, and one that may be depended on to produce a large crop of dark red large fruit of fair quality. Does well in any section.

HORSEY. This variety was propagated by Mr. John Horsey, of Marion, Md., and introduced by Mr. Hall of Rhoadsdale, Md. The plants grow vigorously and make broad beds on most soils. The fruitage is abundant in large firm, dark red berries. Their carrying qualities are of the best, ranking equal to Klondyke. Their season is from early to well past mid-season. The writer saw them bringing prices equal to the later maturing varieties, after it had been on the market for nearly four weeks.

KLONDYKE. (Per.) Early very heavy cropper and of fine shipping qualities will stand up as a long distance shipper for hundreds of miles. Not considered a home garden variety but a money maker to the commercial grower that has to have a berry that will stand shipping long distance. Planted very extensively all through the South and California.

LUPTON LATE. (Per.) Berry large and handsome very productive and almost as uniform as if made in a mould. Very firm, will carry well. Is a proven success. Lupton's Late is better suited to all soils than Gandy. This berry has a great future before it.

MARSHALL. (Per) Mid-season, a favorite sort among market gardeners who practice hill culture and manure heavily. Large in size, fails completely on poor sandy land.

MICHAEL'S EARLY. (Per) Very early, berry small, but a good long distance shipper.

MISSIONARY. (Per) Early berry, size medium to large, flesh dark red, very firm, acid. A reliable market and long distant shipping berry. Berries well colored, large, and hold their size well thru the season. If you are a long distant shipper be sure to order heavy on MISSIONARY, and results will be satisfactory. Our plants are carefully grown and kept free from diseases. One of best varieties for Florida.

MASCOT. (Per.) Late to very late, berry very large, round, conic, very firm, and these fancy berries of superior quality will bring you in some Big Money. Our supply of plants this season is ample to take care of a big demand and expect to be able to fill all orders for this splendid variety and not be compelled to return order as has been the case for the past two seasons. If you use Mascot to mate with your Big Late then you should have an ideal late patch. This berry is making good.

NICK OHMER. (Per.) One of the best healthy growing varieties, fruit large and of fine quality. Mid-season to late, requires high culture. A favorite among the California commercial growers who ship this berry to New York and other Eastern Markets.

PREMIER

PREMIER. (Per.) Still at the head of the class as an early berry, is proving a SUCCESS everywhere excepting in Florida. While Premier is not only a fancy berry it is also the greatest commercial success of any early berry. Almost a sure cropper, as Premier will come thru a heavy frost with less damage to the fruit buds than most varieties.

Do not hesitate or delay in planting Premier. Yet order your supply of plants EARLY or you may be disappointed in getting them.

PAUL JONES. (Imp.) Will grow and make a strong healthy plant bed under almost any condition and will produce a tremendous crop of large berries. Fruit ripens evenly all over. Good quality and a good shipper. Give Paul Jones a chance to prove its value by including a quantity of these plants in your order. Blossom imperfect and should be planted near Sen. Dunlap, Premier, Big Joe or other varieties marked (per) for best results. Plant Paul Jones and get results.

PARSONS BEAUTY. (Per.) Berry medium to large, dark red, irregular conic, a very heavy cropper, fruit a little soft for a long distant shipper, yet stands up well during a dry season. Will produce more quarts of fruit per acre than almost any other mid-season variety.

SENATOR DUNLAP. (Per.) Probably the most widely grown variety in the Northern part of North America. A very good cosmopolitan sort, succeeds almost everywhere, a great drouth resister. Blossom perfect, a strong pollenizer, makes one of the best to plant with such varieties as Paul Jones.

SIONILLI (Per.) Another one of the Kellogg varieties that we have not fruited and offering the plants this year for the first time. We give you the Introducers description. SIONILLI is a strong, stalky growing bisexual which produces big red berries in great quantities. Originated in Illinois. Spell Illinois backward and you have "Sionilli." Makes just enough runners to fill in a good fruiting row. Very easily grown on this account. Is also a great success when grown in hills. Requires no mating; can be grown alone or with other varieties.

SAMPLE. (Imp.) An old standard that is so well known that it is not necessary to describe it. Blossom imperfect and should be planted near Aroma, Big Joe etc.

WOLVERTON. (Per.) Berry medium to large, mid-season, popular market sort in many sections also a good table fruit if you like a mild sub-acid berry.

WM. BELT. (Per.) It is one of the best flavored berries grown, but is rather uncertain in yield and rust badly in some sections. It thrives best in moist soil where it often becomes very productive, and fails in sand.

Everbearing Varieties

THE EVERBEARING VARIETIES, will bear from July until killing frosts stop them from maturing any more fruit. Sweet, delicious and full of real strawberry flavor. Not a commercial, but a home garden berry.

PROGRESSIVE. The old reliable stand-by, the most popular of all Ever-bearing varieties. So far as we know is the only Everbearing variety that proves a success in the South. Progressive is a success everywhere; North, South, East and West. Not so large as some varieties but produces an abundance of delicious quality fruit. Be sure that you get some Progressive of the ALLEN Nurseries Quality. Plant them as late as May and pick fruit in August, and until frost and freezing prevents blooming.

CHAMPION. True to name stock. We believe berries little larger than Progressive.

Lingelstown, Pa., June 23, 1923

Received your tomato plants and they are O. K., so please send me prices on other plants.

J. S. D.

Seaford, Del., June 22, 1923

The Asparagus seed I got from you came up fine.

I am yours truly for success,

A. M. T.

Glen Campbell, Pa., June 20, 1923.

I received my tomato plants O. K. They are fine. I had lovely tomatoes last year from plants bought of you.

A. K.

Lingelstown, Pa., April 27, 1923.

Received the strawberry plants and grape vines O. K.

J. S. D.

Ridgewood, N.J., April 21, 1923.

I wish to thank you and express my appreciation for the fine strawberry plants and for your fair dealing with me.

E. S.

Springville, Pa., April 14, 1923.

Plants received in excellent condition and are growing fine.

J. J. S.

Price List of Strawberry Plants

Purchaser to pay transportation charges.

We strongly advise customers to have their order shipped by Parcel Post, when possible to do so. Do not send any money for postage. We will ship C. O. D. for postage and you may pay these charges when you receive your plants. This saves us considerable book-keeping, as you very seldom could figure the correct postage in advance.

NOTE:—When ordering plants or seeds from this catalog each variety must be added separate. Two or more varieties cannot be added together to make a cheaper rate.

....Do not forget to order your plants this year from Allen Nurseries, Seaford, Delaware, and get fine, healthy clean rooted, clean foliage, true-to-name plants, of the highest fruiting quality; packed and crated by methods that insure you of good, live plants, which will grow and produce great crops of berries.

Asparagus—A Great Commercial Crop

Is now a GREAT MONEY Making Crop with a GREATER FUTURE before it.

The Department of Agriculture at Washington reports only 12 States now growing Asparagus as a commercial crop, yet last year (1924) these 12 states produced \$15,162,000 crop of this very much sought after vegetable. The growers at one small shipping station in South Carolina realized \$56,000 in good United States Money for their Asparagus crop.

The Asparagus crop should interest the large commercial grower, the Market Gardener and the Home Gardener. As to its great value as a food and a tonic to the human family we are here going to repeat the RURAL NEW YORKER'S editorial of July 1st, 1923.

"We have already had asparagus at our house for more than 50 successive days, one after the other, and it would still be cut if the garden was not producing lettuce, spinach, onions, beets and a half dozen others. Asparagus and rhubarb are two great gifts of nature which no man with a spot of land has any business to be without. They are the easiest of all to grow. Once started, they require little care, but grow year after year, yielding the finest Spring tonic and invigorator. We cannot possibly understand how any farmer can live without an asparagus bed. It is so easy to start and it comes so near to taking care of itself and for the family health it is worth a barrel of any medicine that ever was made from drugs.

Our supply of Asparagus Roots and Seed are First Class in every respect. Stock well grades, full of life, healthy, strong and vigorous. Quality will please and results will satisfy.

We offer the following varieties: Palmetto, Giant Argenteuil, Conover Colossal, Barr's Mammoth. Prices as follows F. O. B. here:

ST. REGIS. "Ever-bearing Raspberry," color brilliant crimson, large, juicy highest quality, ships well, very productive.

CUMBERLAND. Very hardy. Fruit very large, and coal black. Considered by many to be the best all round black cap ever introduced.

Gregg, Plum Farmer, and Kansas, at Same Price as Cumberland.

DEWBERRIES

The same as blackberries excepting vines of DEWBERRIES run on the ground where Blackberry canes grow upright. Fruit ripens two weeks earlier than blackberries, coming at a time when very few berries of any kind are on the market, therefore selling for very high prices. For the past several years Dewberries have been a big money maker the fruit selling for very high prices. A well cared for Dewberry patch ought to be good for 15 years. Some of the best patches with us have been fruiting for 12 years. Be sure to send your orders for Dewberry plants to ALLEN NURSERIES, Seaford, Delaware, headquarters for True-to-Name stock of the highest fruiting qualities.

The Lucretia is the best of all dewberries, extremely hardy, bears large crop of big and handsome sweet luscious and a glossy black fruit that carries well, keeps well, sells well.

PRICE OF PLANTS BY MAIL PREPAID. 12 Plants 60c. 25 Plants 80c. 50 Plants \$1.25, 100 Plants \$2.00.

BY PARCELS POST OR EXPRESS NOT PAID, 500 \$8.00, 1000 \$12.50 Ask for Special Prices on large quantities.

AUSTIN DEWBERRIES. I do not consider that they are equal to the Lucretia as they will not stand the long shipping as will the Lucretia.

Price of Austin Same as Lucretia.

SWEET POTATO PLANTS

SWEET POTATO PLANTS: All leading varieties, ready for shipment about May 5th until June 20th.

PRICE BY PARCELS POST PREPAID: 12 for 25c; 25 for 40c; 50 for 75c; 100 for \$1.00.

BY PARCELS POST OR EXPRESS NOT PREPAID: 500 for \$2.00; 1000 for \$3.50. Ask for special price on larger quantities.

TUBEROSE BULBS

EXCELSIOR DWARF DOUBLE PEARL, flowers large, full double, and extremely sweet. Stems of this variety are dwarf and stiffly erect, with long spikes. Does not require to be tied to stakes.

Price flowering bulbs 4 to 6 inches in circumference, 10c each, 3 for 25c, 75c per dozen, prepaid.

100 @ \$4.00, 1000 @ \$20.00 not prepaid.

Small bulbs, 100 \$1.00 prepaid. 1000 \$4.00 not prepaid.

MOSS. If you wish your Asparagus and other vegetables to arrive in market looking fresh as they left your farm then pack in Spagnum Moss. This is the same moss as I use to pack strawberry plants. This moss comes in several size bales. We do not break bales, price on application.

Our Frost Proof Cabbage Plants

Will mature heads two to three weeks earlier than your home-grown plants, and double your profits. Why?

They can be planted in the open ground a month to six weeks sooner than the home-grown hotbed or coldframe plants. These Frost-proof Cabbage Plants will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet, or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero.

The top of the plant does not grow until regular spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts, the established root-growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two to three weeks sooner than you can mature them from hotbed and coldframe plants. You know what the difference in profit will be if your crop is matured and marketed two weeks before the general crop from home-grown plants is matured.

To get the advantage of these frost-proof Cabbage Plants they must be planted a month or six weeks earlier than you would plant home-grown plants. We fill orders from January 1 to May 1. After this date ask for prices on late Cabbage Plants Field-Grown.

Please note this explanation.—The plants when received will be somewhat wilted and have a hard, stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, set them out and they will produce the crop results if weather conditions are at all favorable.

Varieties: Early Jersey Wakefield, Charleston Large Type Wakefield, Succession, Early Flat Dutch and Copenhagen Market. If sold out of variety ordered will substitute next best.

Prices by Parcel Post, postage paid (we pay it), in lots of 100, 200, 300 or 400 plants, at 50c. per 100; \$1.75 for 500; 1,000 or more, at \$3.00 per 1,000. Special prices in lots of 10,000.

These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety you would pay at the 100 rate. (It requires 10,000 to 12,000 plants for an acre; for small gardens order 100 plants for each 80 feet of row.)

Order Early to Get Plants Delivered in Time.—You can place your order one, two or three months ahead, but be sure to tell us when you want them sent. Plants cannot be pulled or shipped when beds are wet. We sometimes have a week or ten days of continued wet weather which prevents shipment. If you do not receive your plants as soon as you expect them, you will know that weather prevents shipment. Send your order now and state when you want them sent or state that you will advise us later when to send them. Be sure to order early for while we can supply millions of plants yet there is a possibility of our receiving more orders than we can fill.

TOMATO PLANTS

For late crop ready for shipment about June 1st. If possible place your order for tomato plants at least ten days before you want shipment made. PRICE 50c per 100 postpaid. By Parcels Post or Express not paid \$2.00, per 1000.

GRAPE VINES

GRAPES. The delicious, juicy, healthy fruit that should be on every farm and in most back yards.

Grow them and get some of the money that is now being taken by the Grape growers of Spain, who send to our nearby markets a large supply of table grapes. Baltimore taken around 500 barrels, Boston 36,000 barrels, Philadelphia 500 barrels while New York used 210,000 barrels of these grapes from Spain. Notwithstanding this large importation of grapes from Spain the grape growers in the United States received last year \$73,705,000 for the commercial Grape crop.

Our stock consists of **GOOD LIVE HEALTHY** plants of the following varieties.

MOORE'S EARLY (Black). The most reliable very early variety and is proven very profitable to commercial growers, and splendid for the home garden. Berries large, jet-black good quality, very valuable as an early grape.

CONCORD. (Black.) The most popular grape in America and most widely grown. Bunches large, compact, covered with **BIG** tender berries, yet sufficiently firm to carry well to distant markets.

Grape juice is largely made from Concord and owing to its productive-ness of this variety, it can be produced so cheaply that no other grape can compete with it, either for this purpose or as a market variety.

ORDER EARLY PLEASE

BARBERRY THUNBERGII

Should be Planted out in Fall or Winter or Very Early Spring.

For a low hedge Japanese Barberry Thunbergii stands at the head of the list. It succeeds without much attention, may be pruned or not just as the owner chooses; without pruning it will form a compact mass, so thick a cat can't get through. Barberry is hardier than California Privet. Spring and Summer leaves are very green and attractive; in autumn after most other shrubs are bare, its small oval leaves then assume rich crimson colors and the slender branches droop with their load of bright red berries which hang on until late winter. Owing to its dwarf habit of growing it is also extensively planted for borders, and single and bunched specimens on the lawns, no other shrub or hedge plant surpasses Barberry Thunbergii.
